Contribution of individual authors to the creation of a scientific article (ghostwriting policy)

-Ivan K. Andrianov carried out the formulation of the problem research and modelling.

-Elena K. Chepurnova carried out a series of calculations of the pressure and diameter of the capsules of the system.

Sources of funding for research presented in a scientific article or scientific article itself

The research was carried out at the expense of the grant of the Russian Science Foundation № 22-79-10114 «Development of the damage detection system for turbine blades and the cooling optimization method under the thermal fatigue conditions» (<https://rscf.ru/project/22-79-10114>).
